SUMMARY

Skilled Frontend Developer with 2+ years of experience creating dynamic, user-friendly websites. Proficient in HTML, CSS/SASS, and JavaScript, with expertise in React, Tailwind, and jQuery. Strong in modern web accessibility standards and best practices. Proven ability to manage teams and review code effectively. Seeking a role in a progressive company to deliver innovative web solutions and drive departmental success.

EXPERIENCE

Frontend Developer Intern | APIDNA - Luxembourg, EU (Remote)
May 2024 - Present

- Developed a user interface for data comparison utilising React, RESTful APIs, and NPM packages, leading to a 15% increase in user engagement.
- Debugged, reviewed, and tested code for international team members, reducing bug-related delays by 22%.
- Managed weekly tasks using Kanban boards, enhancing team productivity and enabling the completion of 3x more tasks within a given week.
- Led team presentations during client calls, effectively communicating project deliverables and enhancing client satisfaction week-on-week.
- **Additional Tasks:**
  - Assisted in the creation and maintenance of documentation for frontend features and best practices.
  - Participated in code reviews to ensure code quality and adherence to company standards.
  - Implemented responsive design principles to ensure websites function well on various devices and screen sizes.
  - Collaborated with designers to ensure the technical feasibility of UI/UX designs.

Frontend Developer | Wavemaker UK - London, UK
October 2021 - Present

- Translated design concepts from Photoshop, Adobe XD, and Figma to HTML and CSS for display ad banners, reducing client creative costs by 35%.
- Reviewed team tools and developed coding solutions, improving productivity by 38%.
- **Additional Tasks:**
  - Assisted in the creation and maintenance of documentation for frontend features and best practices.
  - Participated in code reviews to ensure code quality and adherence to client standards.
  - Collaborated with designers to ensure the technical feasibility of UI/UX designs.
